 Portfolio

 Atlanta, GA

PROFILE

Full-stack developer with one year experience, shipping React/Node apps, plus four years in Structural Engineering, where I coded Dynamo automations in Revit, cutting project time by 30%. Strong in JavaScript, PostgreSQL, AWS, UX/UI, and Agile workflows. Delivered scalable solutions, custom algorithms, and collaborated with cross-functional teams, ensuring efficient outcomes.

EDUCATION

Diploma in Full Stack Application Development

Lighthouse Labs | Vancouver, Canada, 2023

Associate Degree in Engineering Design and Drafting

Southern Alberta Institute of Technology | Calgary, Canada, 2020

KEY SKILLS

- Frontend: React, Next.js, JavaScript, HTML/CSS/SASS, jQuery
- Backend: Node.js, Express.js, Ruby on Rails, PHP
- Databases: PostgreSQL, MySQL
- DevOps & Tools: AWS, Docker, Git, Jest/Mocha/Chai, Cypress
- Other: UX/UI Design, AutoCAD, Revit (Dynamo), Agile

PROFESSIONAL EXPERIENCE

Structural and Technologist | 03/2026 - Present

Bolen Engineering | Remote

- Delivered 47 fully drafted custom homes and 3 multi-story buildings.
- Developed a comprehensive Revit library of detail sections and custom components, reducing drafting time by 35% and eliminating redundant tasks across multiple projects.
- Created automated Revit families and parametric tools to streamline repetitive detailing, boosting team efficiency and consistency on high-end residential builds.
- Provided precise structural sections, including connection designs, shear wall layouts, and foundation tie-downs—minimizing RFIs and field rework.
- Organized project timelines, tracked changes, and maintained daily communication with architects, engineers, and clients—delivering accurate, high-quality drawings on schedule.

Fullstack Software Developer | 05/2025 - 03/2026

Hideki Digital | Remote

- Built and shipped 8 full-stack apps (React, Node, Express, PostgreSQL), integrating RESTful APIs and SQL databases—zero major bugs on launch.
- Designed responsive UIs with Storybook testing; optimized UX for client tools, lifting satisfaction 25% per client feedback.
- Customized WordPress themes and functionalities, integrating databases and enhancing front-end components, resulting in improved website functionality and responsiveness.
- Published Express.js server template with SQL database + JavaScript algorithms, npm package — cutting setup time for the team by half.
- Conveyed with senior developers in tri-weekly meetings and milestone reviews, addressed issues early, kept deliveries smooth.

Structural and Architectural Engineer Technologist | 08/2020 - 12/2024

JBS Drafting | Vancouver, BC (Remote) | 05/2022 - 05/2025

Eagle Builders | Red Deer, AB | 08/2020 - 05/2022

- Automated Revit workflows with Dynamo scripts — saved 4–6 hours per project, cutting timelines 30%, increasing overall productivity and profit margins.
- Delivered 66 projects (44 custom homes, 22 large-scale structural projects) over 30 months.
- Maintained 100% first-pass approval on deliverables through strict QC.
- Built precise 3D/2D models in Revit, AutoCAD, Rhino for standardized and customized equipment.
- Improved operational efficiency by breaking down intricate tasks into logical, sequential steps, reducing errors, and guaranteeing timely project delivery cycles.
- Collaborated with engineers/architects, in weekly meetings, resolved gaps, kept delivery on track.
- Generated and executed structured troubleshooting workflows, including data recovery protocols, successfully restoring critical files and preventing financial losses.
- Implemented automated solutions to enhance efficiency, enabling teams to prioritize high-impact tasks and adapt quickly to evolving project requirements.
- Demonstrated expertise in design software such as Revit, AutoCAD, and Rhino, serving as a key resource for technical proficiency, project documentation, and quick decision-making under pressure.

Flight Controller , Offshore Platforms | 05/2013 - 04/2018

Subsea7 | Brazil

- Coordinated helicopter operations for offshore oil rigs on the Brazilian coast, handling weather, safety, and multicultural communication in a high-pressure environment.
- Translated technical manuals (propulsion, piping, etc.) and served as an interpreter in high-risk pre-operation meetings, facilitating communication between multicultural teams.
